

Deadline for HAZMAT Registration: JULY 1, 2009

Any business that ships hazardous materials (interstate or intrastate) requiring a US DOT placard must register each year and pay the fee. This includes petroleum jobbers, common carriers of petroleum products, oilheat dealers and propane suppliers who ship their product in trucks.

Regulatory Counsel, Mark S. Morgan, Esq., has produced a thorough compliance kit that explains this issue and provides guidance. As a benefit to NEFI members, the Action Center has posted this document on its website, www.NefiActionCenter.com. To obtain a copy, you can [click here](#). Please note that this is only available to NEFI members. All NEFI members must set up a user-name/password to obtain this and other valuable compliance documents. To setup a username/password, simply [click here](#).
