

The New England Fuel Institute's Technical Training Center has announced classes they are offering in December and January.

There will be four half-day seminars on Mass. Oilburner Code 527 CMR 4.00 offered on December 16 and 17. Each seminar is 3.5 hours in duration, and can be taken in either the morning or afternoon session. The course awards 4 NORA CEUs. [Registration](#)

A new 160-hour Basic Oilburner Installation & Service Technician course starts on December 29 and runs through January 23, 2009, Monday through Friday, 7am - 3:30pm for four weeks. Instructor Bob Messia teaches the course in the state-of-the-art training lab in Watertown, Mass. [Registration](#)

A special seminar is being offered "Oilheat Wiring for the Electrician" on January 5-6, 2009, that is designed for the licensed electrician who would like to learn the specifics of wiring for Oilheat systems including hot water, steam, power venters, etc. This is a six-hour course (three hours each day) and will be held in the training lab, Watertown, Mass.
