

NEFI SCORES MAJOR VICTORY ON SPCC REGULATIONS!

This Compliance Bulletin is a more detailed primer on the new SPCC rulemaking that was mentioned in a NEFI Regulatory Alert issued on Friday, November 21, 2008. Additionally, NEFI has planned an **online webinar** for **January 14, 2009 at 2pm (EST)** that will give a full overview of requirements under the SPCC rule.

The webinar will cover what is currently required as well as the most recent amendments. Don't miss it.

ISSUE:

The U.S. Environmental Protection Agency (EPA) has issued a final SPCC rulemaking this week that includes important compliance information for fuel dealers who store petroleum products in aboveground storage tanks. The final rule provides petroleum marketers with new flexibility in meeting SPCC plan revisions that must be implemented in 2009. The final rule will make compliance with SPCC revisions more streamlined and cost effective.

NOTE:

This compliance bulletin is only available to members. It can be accessed by [clicking here](#) and then entering your username and password. If you are a member who has not yet created a username and password, you can do that by [clicking here](#). If you have any questions about the compliance bulletin, SPCC webinar or any general questions concerning the NEFI Action Center, please see the contact information below. Thank you.
