A complete course in electrical wiring, controls and advanced troubleshooting.

The course was designed for senior technicians to master the knowledge and professional skills to work on and diagnose the state-of-the art control systems now entering the field!

This course will review the fundamentals of electricity, wiring and control systems and move on to the most advanced and complex control systems entering the field for the control of hot water, steam and warm air systems. Features trainer/demonstrators specifically built to teach this program and includes hands-on training using *student provided multimeters* and clamp meters. Subjects covered will include air system electronic controllers (ST9103) and the latest hydronic controls from Honeywell including the AQ475, L7148 and L7224. The troubleshooting of PSC and ECM motors, electronic ignitors and oil valves using meters will be merged with traditional methods and techniques. *Students must bring a multimeter to participate.*
