Practical training on residential steam systems being retrofitted & serviced today.

The seminar is for those who service and retrofit residential steam systems. Ideal for service technicians, installers and sales personnel. The seminar covers the correct replacement of steam boilers and the troubleshooting of piping problems, venting problems and the controls and wiring of residential steam systems.

The book, *Linhardt's Field Guide to Steam Heating*, is included (a \$60.00 value) and offers the service technician, installer and salesman a reference manual that keeps the engineering required in simple, easy to understand language. The troubleshooting tables in the manual are unequalled. All required training materials are provided. Seats are limited and sold only on a first-paid, first-seated basis.

This school is licensed by the Massachusetts Department of Elementary & Secondary Education, Office of Proprietary Schools.
