Payment must be received in full by the start of the course.

**MAY 18, 2009**

**(8:00 AM – 12:00 PM)**

at

**New England Fuel Institute**

**20 Summer Street, Watertown, MA 02472**

**Tel: 617-923-5019, Fax: 617-924-5962, Email: [school@nefi.com](mailto:school@nefi.com), [www.nefi.com](http://www.nefi.com)**

**(Coffee and donuts will be served)**

The 4 hour Roth DWT Certification Program includes the necessary instructions for installation of all Roth DWT products. It is presented in a PowerPoint format. A written test at the end completes the training necessary to be certified to install a Roth DWT. We will focus on its application regarding Biofuel storage, indoor tank application, outdoor tank applications, focusing on some industry issues in fuel fill rates and high pressures, fuel quality and how this effects the Roth DWT. These trainings are conducted on a regular basis by Roth personnel and our manufactures representatives. We value NEFI continued efforts to improve the Fuel Oil Industry of New England, and their existing high quality standards of installation and service, with their members participation in our training/education program(s) Roth Industries distribute a fuel oil storage tank that consists of a seamless, blow-molded polyethylene inner tank and a galvanized steel outer containment tank. We have been manufacturing and selling these tanks in Europe for over twenty years and selling these tanks in the US and Canada for ten(10) years. Our tanks carry a lifetime warranty against corrosion of the inner tank and a Fifteen (15) limited warranty on the outer steel tank. Along with this, each tank carries a \$1,000,000.00 (US) per occurrence insurance policy to cover an oil spill clean-up resulting from a manufacturing defect in our tank. All of our tanks are UL® approved under SU2258 which covers non-metallic fuel oil storage tanks. Each tank undergoes rigorous factory testing to ensure compliance prior to the UL® label being applied. These tanks also comply with NFPA 31 (2001 edition) and CSA B-139-04 sections covering non-metallic fuel oil storage tanks. All North American Roth DWT tanks are manufactured at our Watertown, NY facility. It is an American Made product. They have been installed and are currently in service in all of the Atlantic Seaboard. Roth DWT tanks are not only environmentally friendly but also are one of the safest fuel oil tanks available on the market today.
